

LWC Community Radio Service (CRS)

The December 7th, 2024 radio poll of Safety Captains, BOD members, staff and residents was conducted on the new [LWC Community Radio Service](#) from the Crow's Nest in the Rec Center on channel 15. Radio team member Michael Tomlinson conducted the poll and reported that the new system performed well above the baseline of the former system. Michael was able to hear and be heard "loud and clear" by everyone who called in throughout the community, with just a few exceptions where adjustments need to be made to individual radios.

We had invited Michael Dane with the City of Depoe Bay's Emergency Operations Center (EOC) to call in, and were pleased with the high quality transmission we had with him as well as with several members of the Safety Committee for the Stonebridge community on the hill. While we may be physically separated from our neighbors north of the bridge in a worst case scenario, being able to communicate and relay information through the EOC will be a valuable resource.
