

## **Using Natural Gas Appliances During a Power Outage**

Northwest Natural Gas is the provider for homes in our community that use natural gas. An article on their webpage [“Put Natural Gas in Your Power Outage Emergency Kit”](#) includes two minute instructional videos about how to safely operate most models of natural gas cooktops, fireplaces and water heaters during a power outage. Now is the time to check to see what adaptations you may need to make so you can use your natural gas appliances during a power outage.
