

How Do They Know That?

Scientists Solved the Mystery of a 300 Year Old Megaquake: the 1700 Cascadia earthquake and tsunami

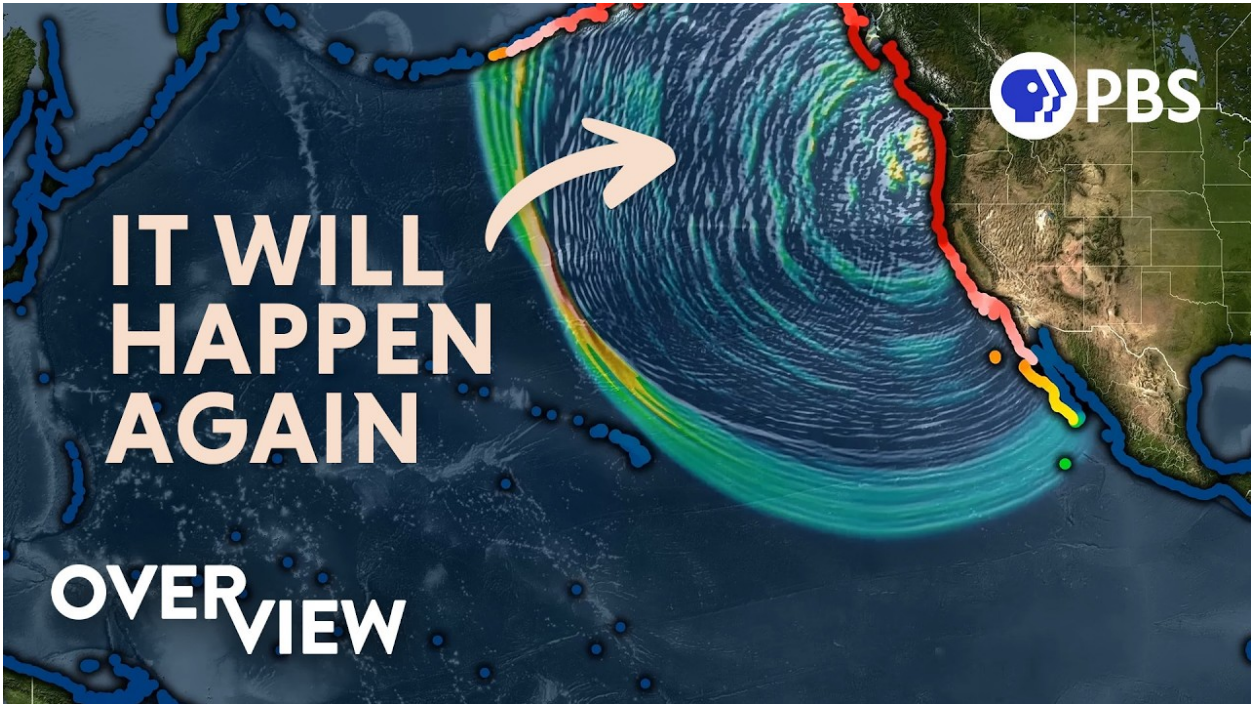

January 26, 2025 marked the 325th anniversary of the last known “megathrust” earthquake (Magnitude 9.0+) along the Cascadia

Type to enter text

Subduction Zone, the 600-mile-long fault off the Pacific Northwest coast. The 1700 Cascadia earthquake and tsunami was a massive natural disaster that reshaped the Pacific Northwest. Through the science of tree rings (dendrochronology) soil layers, and international collaboration, scientists have pieced together the exact timing of the event.
